Import Apple Music

Step 1: Click " + " on the upper left or "**Click Here to Add Audio**" button in the middle, then the adding window will pop up.

Step 2: Locate and select the files you want to add, and then you can see all the selected files are shown in the file list.
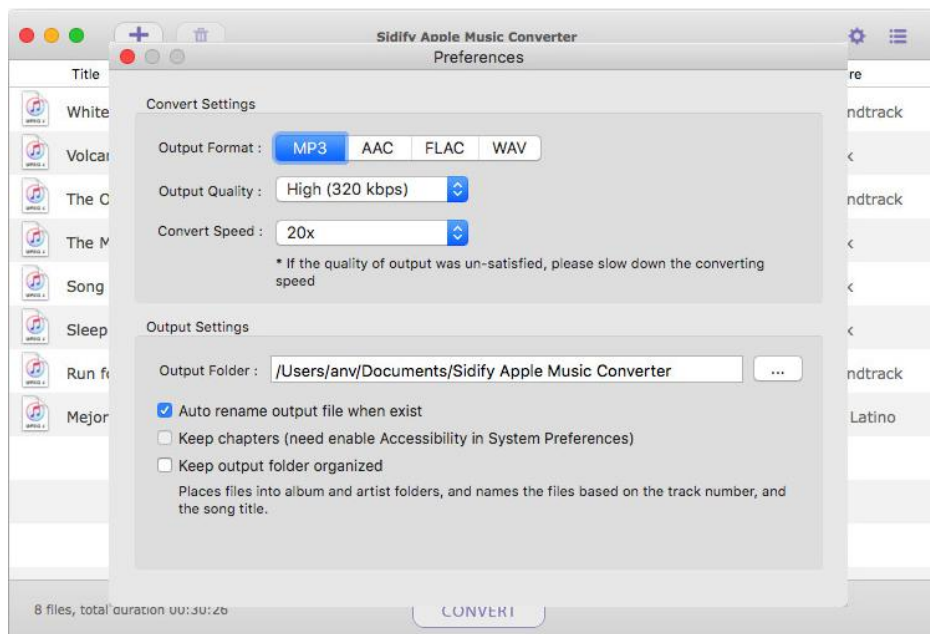

Delete Music Files

Select the files you want to delete at first. Then Click the **Remove** button to delete.
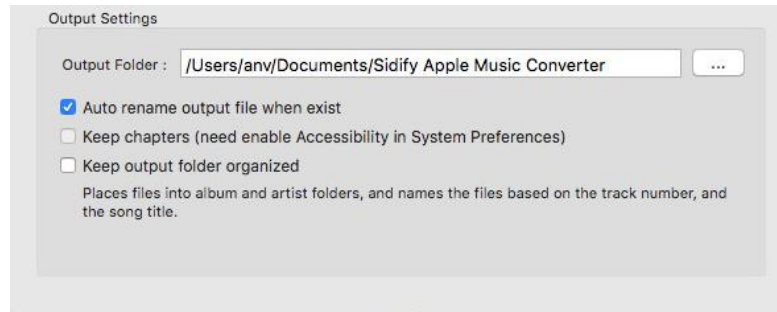

Choose Output Format

Clicking the menu bar **"Sidify Apple Music Converter > Preferences"** or directly click setting button on the upper right of Sidify, a window would pop up. Here you can choose output format (MP3, AAC, FLAC or WAV), output quality (High 320kbps, medium 256kbps, low 128kbps, audiobook 64kbps) and convert speed (20x, 10x, 5, 1x).

Customize Output Path

In this setting window, you can change the output path as required. Alternatively, you can also click **Sidify Apple Music Converter > Preferences** on the upper left of your Mac and choose the output path in the popup window.

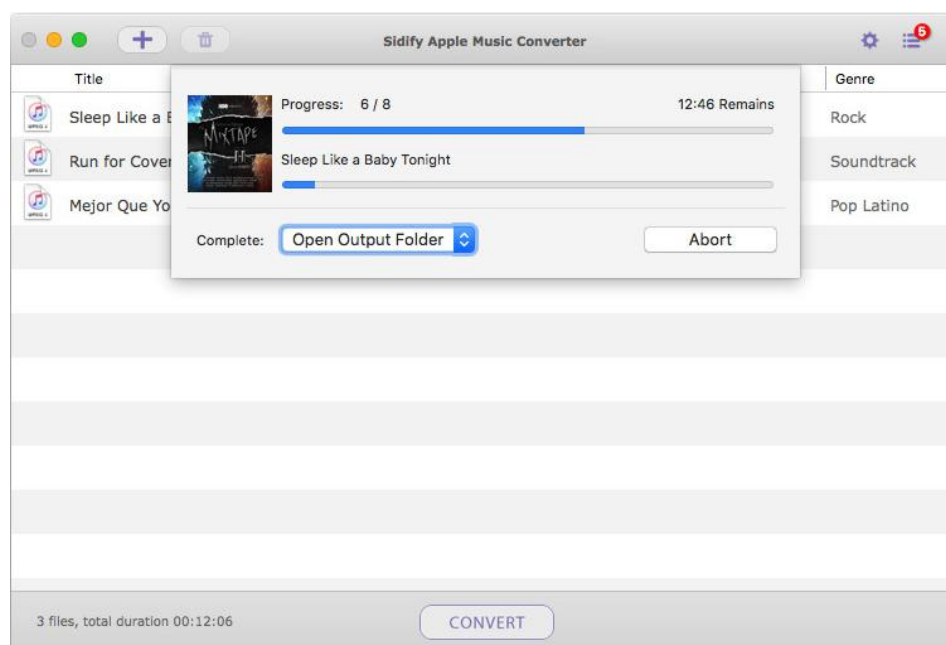

Tips:
1. If you don't want to change the output path, the audio files will be saved under default folder.
2. Wanna keep the chapter of the audiobooks? You'll need to choose AAC as output format. (For more details, please refer to this tutorial.
3. If you need to automatically store the output audio into Artist / Album folders, pleases check the box of the "**Keep output folder organized**".

Start Converting Music

Once everything is ready, just click the **Convert** button to start conversion. At the same time, iTunes will be launched again if it has been closed after started together with the program.

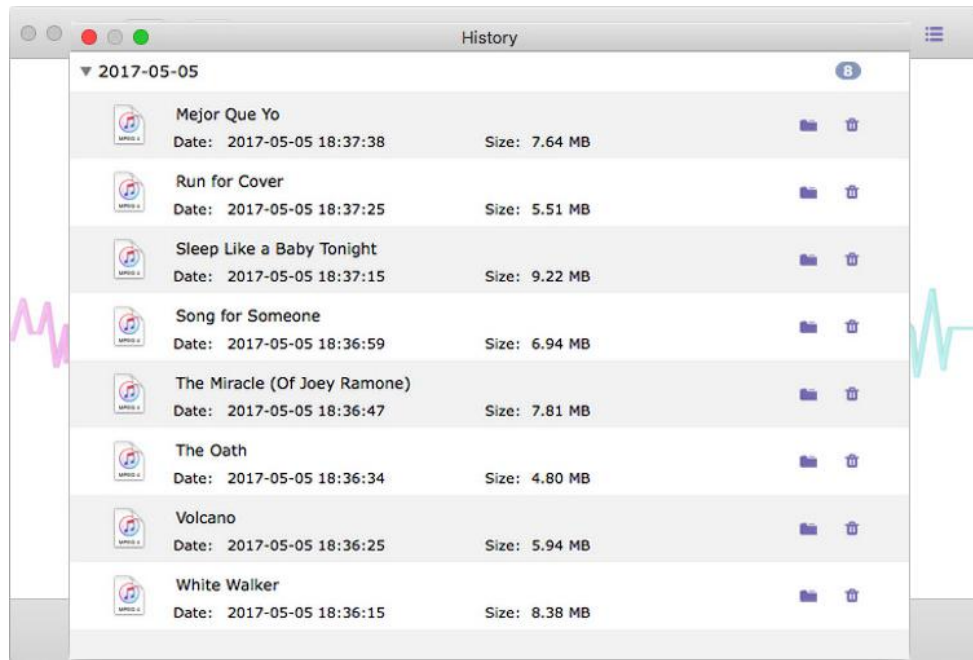

Warning: Before the Status show converting progress, iTunes will pop up and hide itself in a flash, and please don't do anything with iTunes during converting to prevent conversion failure.

Check Conversion History

When the conversion is completed, the history records will be saved automatically. Click the History button to show up the records.
